<p>Health Links™ Colorado: Creating Cancer Supportive Work Environments as Part of Organizational Change in the Workplace.</p>	<p>Poster Session <i>Day 2 – Wednesday</i> <i>May 9th, 2018</i> <i>8:30am-9:30am</i></p>
Description of Presentation	Presenter Name(s) And Credentials
<p>Currently, one of the greatest demands organizations face is creating an environment that provides cancer-supportive practices, including flex-time, accommodations, and medical leave. Health Links™ is a program that aims to bridge the gap between the work environment and workers by creating a culture of health, safety and wellbeing. Working with key stakeholders from a variety of industries and sectors, Health Links™ created a Cancer-Supportive Workplace Assessment tool to help simplify how cancer supportive practices are implemented. This assessment tool utilizes evidence-based practices and takes a comprehensive look at organizations to identify policies, services and benefits that support cancer-friendly practices. Workplaces can use the Cancer- Supportive Workplace Assessment tool to inform their organizational structure. This poster presentation will highlight best-practices found in research, how businesses throughout Colorado can utilize the Cancer-Supportive Workplace Assessment tool, and provide a framework for how this tool will be used to assess organizational structures nationwide.</p>	<p>Kelsey Brown, MPH <i>Center for Health, Work and Environment</i></p>
